1. The lengthy specification has not been checked to the extent necessary to determine the presence of all possible minor errors. Applicant's cooperation is requested in correcting any errors of which applicant may become aware in the specification.
2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 1-20 are rejected under 35 U.S.C. 102(b) as being anticipated by Lewis 6,082,616. Lewis discloses an ATM machine which includes, as seen in figure 2, a plurality of sheet metal parts (58) and (62). There are disclosed "slots" in sheet metal part (58) which are receptive of bent or bowed tab parts on sheet metal part (62) for securely fastening (62) to (58). The size of the tabs on (62) inherently substantially correspond to the size of the slots in (58). As seen in the figure, the tips of the tabs are tapered.
4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Halliday et al 6,147,485 discloses sheet metal parts with tabs and slots.
